Members of the Barcelona Energy Agency Consortium

## TOWARDS A NEW ENERGY CULTURE

The **Barcelona Energy Agency** is a local public consortium that was created to advance towards a new territorial and local energy model based on the principles and values of a culture of sustainability.

In its commitment to acting in favour of a more sustainable global energy model from the local arena, the **Energy Agency**...

The goals of **Barcelona Energy Agency** are:

- To guarantee the application of the city's Energy Improvement Plan, which will take the city to a new energy and environmental scenario by the year 2010.
- To foster energy saving and energy efficiency.
- To promote the use of local renewable energy sources.
- To continue to improve the quality of energy services.

**BARCELONA  
ENERGY AGENCY**

**1** **analyses** and studies the regional and municipal energy situation through the Barcelona Energy Observatory

**2** **promotes** and participates in the drafting of major emblematic and innovative projects for the city

**3** **encourages** the use of solar thermal and photovoltaic energy on the basis of the Solar Thermal Ordinance and by the installation of such energy capture systems in municipal facilities and buildings

**4** **boosts** energy efficiency in buildings, facilities, services and new town-planning actions in the city

**5** **fosters** intervention and participation with the aim of involving the community in the dynamics of agreement and consensus on the major energy issues

**6** **provides** information and works to promote all the values that encourage progressive change towards a new energy culture.
