Who are we?

The Barcelona Local Energy Agency is a public consortium created to drive, manage and monitor Barcelona's Energy Improvement Plan. Founded in May 2002, it is the end result of a long process that started thanks to the efforts of entities, organisations, institutions and individuals.

The Agency aspires to be a place to meet, coordinate and collaborate, with the desire to advance together towards a better awareness of energy and its use.

That is why we are addressing all citizens, companies and administrations, with the aim of improving environmental quality and contributing to the sustainable development of the city by means of increased awareness and the promotion of clean, renewable energies, as well as more efficient systems.

Our objectives

- Foment energy savings
- Promote energy efficiency
- Increase the use and awareness of renewable energies
- Encourage quality improvements in energy services
- Improve environmental quality

Consortium members

The services we offer

INFORMATION AND ADVICE

- Information and documentation centre for individuals, professionals, firms and institutions on the use of renewable energies and energy savings.
- Advice on applications for relevant grants and assistance.

PROMOTION AND AWARENESS RAISING

- Running awareness campaigns, meetings and seminars on renewable energies and environmental education.
- Supporting the training of technical staff and professionals.
- Supporting relevant citizen initiatives.

CARRYING OUT STUDIES AND PROJECTS

- Execution of programmes to install thermal and photovoltaic solar panels on public buildings.
- Permanent observatory on energy issues, as well as monitoring and providing information on technological trends. Studies and publications.
- Support and collaboration with nearby municipalities and European and international partners.
